I started my adventure with IT thanks to my husband, a passionate IT geek. He made me realize that I could develop my interest in the broadly understood language in a slightly different field. In the past I studied language and literature, later I realized myself as a teacher. Now I have decided to change my professional path a bit and try my strength in the dynamic world of IT. Now I am looking to further with a successful and dynamic company that offers room for progression.

Recently I participated in the Just IT course, where I had the opportunity to expand my competences in designing responsive websites using HTML/CSS/JavaScript and frameworks such as Bootstrap or Materialize. Thanks to this course, I also learned the basics of database design and operation.

I am currently working on expanding my competences with Node.js and React.

## WORK EXPERIENCE

### **Full-time Mum** 2016 - present
